

LightWise® Architectural Systems

Your Vision Engineered to your Specifications

Your need for aesthetics and function differs from project to project. We think your glass options should too. With LightWise Architectural Systems, Pittsburgh Corning introduces a new line of possibilities – those limited only by your imagination. Whether you are looking for an innovative way to enhance daylighting in a commercial project, or have interior space in need of color and texture, or are seeking enhanced security and blast tested panels for a government facility – we have the solution.

With LightWise Architectural Systems, Pittsburgh Corning lets you capitalize on the possibilities we have long offered with our flagship product, glass block. LightWise Architectural Systems give you the opportunity to create complete glass block panels to your unique specifications. And if a “block” is not what you are looking for, we will work with you to find the right modularity that will meet your needs.

All LightWise Architectural Systems are:

- Engineered and pre-fabricated into panelized systems that can be easily and quickly installed
- Customizable to meet project needs
- Guaranteed to meet your performance requirements
- Useful for daylighting strategies and can contribute to LEED points
- Available with a range of visibility and privacy options
- Graffiti-resistant, damage-resistant and easy to clean

We’re confident you will see that LightWise Architectural Systems are visually stunning, offering design possibilities. They are functionally smart, providing physical possibilities. And because of our collaborative approach to working with architects, from conceptual design all the way through installation, each system enables new possibilities in customization.
